

Thermometers with condensation barrier // Aluminium gold anodised

Type 291

Type 292

Your advantages

Type	291 / 292 with condensation barrier
	<ul style="list-style-type: none"> • For use in refrigeration applications • Prevents condensation on the thermometer casing • As a side effect, the 50mm long condensation barrier allows the bridging of thick pipe insulation • Lifetime warranty (except for broken glass and improper installation) • Completely without electrical auxiliary power • Available as type 291 (straight) and 292 (90° angled)

Order code

Type								
Straight	291							
Angled version 90 °	292							
Immersion tube								
Type B		2						
Display ranges								
-30...50 °C			35					
-10...50 °C			04					
Scale								
Celsius °C				1				
Thermometric liquid								
Blue					1			
Immersion tube installation lengths (l₁)								
63 mm						063		
100 mm						100		
Fixed male thread								
G1/2							2	
Immersion tube material								
Brass								1 ISO
Stainless steel								3 ISO
